PROJECTS

To-Do List Web Application

Application developed using HTML ,CSS , jQuery . Local storage is used for saving the tasks .User can add task to the list, mark them completed, delete the existing tasks ,sort the tasks as total tasks, completed tasks, pending tasks.

Responsive Templates

Some responsive templates using media queries . Demos are available at my blog.

Infinite Scroll

Uses Openweather api to get JSON data to fill list entries with weather details of provided cities.

Web Application

Application developed using HTML,CSS, JQuery. This project uses SoundCloud API to incorporate SoundCloud functionality such as search tracks of a specific genre,retrieve user's playlists,likes,following,etc.For authentication I used OAuth 2.0.
